

For airway control in an emergency situation, there's no compromise.

The GlideScope® Ranger Video Laryngoscope consistently provides a clear, real-time view of the airway and tube placement — ideal for EMS, military, and crash cart use.

The Ranger system is based on the GlideScope GVL®, which achieves a Cormack-Lehane Grade I or Grade II view 99% of the time.¹

And GlideScope® Ranger was designed to meet military specifications.

Actual airway view.

FEATURES

- ▶ Portable, rugged, and operational in seconds
- ▶ High-resolution camera for real-time view of the airway and tube placement
- ▶ Anti-fogging mechanism resists lens contamination
- ▶ Non-glare color monitor easily visible in bright light
- ▶ Unique blade angulation
- ▶ Reusable and Single Use configurations
- ▶ Easy to use, easy to teach
- ▶ Federal Contract No. V797P-4669A

A consistently clear, real-time view.

Applications

- Pre-hospital (field) airway treatment
- Level 1, 2 and 3 Military medicine casualty centers
- Trauma airways — excellent when dealing with blood & secretions in the airway
- Challenging airways (DL Grades I-IV)
- Intubation with cervical spine immobilization
- First use intubations, replacing DL
- Teaching airway anatomy

System Components

- 8.9 cm color video monitor in soft-pack case
- Choice of Ranger GVL® 3 or GVL® 4
- Integrated, rechargeable lithium battery
- Medical grade recharger operating at 50-60 Hz and 100-250 V
- GlideRite® Rigid Stylet
- User's Manual and Quick Reference Cards
- 1-year warranty

Field Specifications

- Compact size for easy carrying & storage (168 x 173 mm)
- Lightweight for maximum portability (< .56 kg)
- Rugged construction
- 90-minute continuous use battery
- Altitude up to 6100 m
- Temperatures of -20° C to 50° C
- Humidity up to 100%

GlideScope® Products and Systems - Designed for 1st Pass Success

	REUSABLE	
Ranger GVL® Size	GVL® 3	GVL® 4
Patient Weight	10 kg - Adult	40 kg - Morbidly Obese
GlideRite® Rigid Stylet	<i>For use with endotracheal tubes 6.0 mm and larger.</i>
