

Phoebe Putney Memorial Hospital

World - class medicine. Hometown commitment.

417 Third Avenue Albany, Georgia 31701 (229) 312-1000

I just wanted to let you and your company know how excited our unit it is to have utilized the BladderScan BVI 3000. It has been a great success!

The patients love the fact that they do not have to go through the pain and embarrassment of unnecessary urinary catheterizations. The nurses appreciate the quick results and time saved. The physicians are impressed by it's accuracy and the fact that it can reduce Noscomial urinary tract infections.

We have used BladderScan to measure post-void residuals, check Foley and supra pubic catheter patency, and assess for urinary retention after catheter removal. The fact that BladderScan is so safe and accurate has won me over!

Our patients are highly satisfied and amazed what the BladderScan does. They tell us what a relief it is to know that they will be catheterized only if needed as dignity is of utmost importance.

I was also impressed with the on-site training for the staff and the follow-up calls/emails from you to check on the progress of the BladderScan and to answer any questions.

The BladderScan provides a way to measure bladder volume in a cost effective, safe and precise way. I highly recommend the Bladder Scan BVI 3000 to anyone who has a patient population that would benefit from these advantages.

Thank you Diagnostic Ultrasound for the BladderScan!
