## GlideScope Spectrum QC Single-use Video Laryngoscopes

GlideScope® Spectrum™ QC single-use video laryngoscopes, designed for first pass success, feature the latest advances in camera technology and video laryngoscope design to enable quick intubation across a wide range of patient types and clinical settings.

## Single-use Convenience

Minimize the risk of cross-contamination with single-use video laryngoscopes.

- Fully disposable blade and handle helps reduce risk of cross-contamination
- Single-use means easier access when you need it

## Proven Clinical Performance

GlideScope® hyperangulated video laryngoscopes enable improved laryngeal exposure<sup>1</sup>, lower lift force on patients<sup>2</sup>, and higher first-pass success rates.<sup>3,4</sup>

- Improves first-pass success intubation rates compared to direct laryngoscopy<sup>3,4</sup>
- Enables C/L I & II views in 99% of patients studied<sup>1</sup>

## Enhanced Airway Views

Spectrum™ QC video laryngoscopes incorporate imaging improvements that increase sharpness, vividness and field of view.

- Expands visualization in the airway with 14% improved field of view<sup>5</sup>
- Helps you distinguish anatomical detail with 50% sharper, more vivid images<sup>6</sup>
- More light where you need it with 30% brighter LEDs for Mac and 100% brighter LEDs for Miller<sup>7</sup>

7. Comparing Spectrum QC Mac/Miller versus Spectrum HDMI Mac/Miller

**COVID-19 Airway Management Guidelines recommend: "Laryngoscopy should be undertaken with the device most likely to achieve prompt first-pass success in that operators hands ... in most fully trained airway managers this is likely to be a video laryngoscope."**

Cook TM, El-Boghdady K, McGuire B, McNarry AF, Patel A, Higgs A. Consensus guidelines for managing the airway in patients with COVID-19: Guidelines from the Difficult Airway Society, the Association of Anaesthetists the Intensive Care Society, the Faculty of Intensive Care Medicine and the Royal College of Anaesthetists. Anaesthesia. 2020 Jun;75(6):785-799.

# Innovative Form and Function

Spectrum™ QC single-use video laryngoscopes feature innovative magnetic QuickConnect™ technology enabling improved workflow and faster connections.

## Magnetic QuickConnect

Improves workflow and connectivity

50% Greater  
Retention Force

at the cable connector<sup>1</sup>

## Low-profile Design

Designed to decrease lift force on patients<sup>2</sup> and improve view of the glottis<sup>3</sup>

# Brilliant Image Quality

Spectrum™ QC video laryngoscopes provide visualization improvements that empower clinicians to act with confidence in routine and emergent situations.

# An Extensive Portfolio of Single-use Video Laryngoscopes

GlideScope® Spectrum™ QC single-use video laryngoscopes feature the latest advances in lighting and camera technology to enable quick intubation across a wide range of patient types and clinical settings. Choose from a broad portfolio of angulated and direct style blades.

## Hyperangulated Video Laryngoscopes

Hyperangulated video laryngoscopes have been shown to enable improved laryngeal views<sup>1</sup> and less lift force on patients<sup>2</sup>. Low profile blades improve maneuverability and working space in the patient's mouth.

## Compatible Monitors

Configure your GlideScope® video laryngoscopy system to the unique demands of your clinical setting. From hospital settings to surgery centers, find the option that suits your needs.

GlideScope® Core™ 15

GlideScope® Core™ 10

## Easy-to-use Stylets For Quick Intubation

GlideRite® Stylets enable ET Tube control and placement while using GlideScope hyperangulated video laryngoscopes. The preformed, rigid design coupled with easy-to-use handles are available in single-use and reusable options.

# The Total Airway Solution

## Single-use Video Laryngoscopy and Bronchoscopy In One Mobile System

GlideScope® with BFlex™ – the Total Airway Solution – integrates high quality bronchoscopy and video laryngoscopy with live dual views and brilliant visualization – empowering you to act with confidence in routine and emergent situations.
