Single-use Video Laryngoscopy and Bronchoscopy in One Mobile System

GlideScope® with BFlex™ —the Total Airway Solution— integrates high quality video laryngoscopy and bronchoscopy with live Dual View and brilliant visualization—empowering you to act with confidence in routine and emergent situations.

Brilliant Visualization

- Bright, crisp image quality with a 15" Full HD or 10" HD monitor
- Clear line of sight with an articulating arm that positions the monitor over the patient

Easier Intubation

When every second counts, live simultaneous video laryngoscopy and bronchoscopy views help you navigate and secure difficult airways.

Streamlined Workflow

- Easy setup and faster turnaround with the advanced workstation
- Access to all the tools you need right at your fingertips
- Convenient prep tray and storage bins organize critical cables and tools

Extensive Portfolio of Tools

- Quick access to tools covering routine to difficult airway management, and bronchoscopy procedures
- Broad range of single-use video laryngoscopes and multiple sizes of bronchoscopes

“

The Dual View gave us an advantage. It allowed us to secure that airway quickly, it allowed us to do it as a team. It allowed everyone in the room complete visualization.

Sarah Pierce, Certified Registered Nurse Anesthetist, Kootenai Health

Advanced Airway Visualization System

GlideScope Core is an all-in-one system offering immediate access to the tools you need to visualize the airway and tracheobronchial tree. Designed around an HD, touchscreen monitor and comprehensive workstation, GlideScope Core delivers elevated visibility and improved workflow.

GlideScope Core is the first airway visualization system with live Dual View image capability, to view the airway via a GlideScope video laryngoscope and BFlex bronchoscope simultaneously.

15" Full HD Touchscreen Monitor

10" HD Touchscreen Monitor

Articulating arm to position monitor over patient for clear line of sight

Hook attachment stores BFlex single-use bronchoscopes

Convenient prep tray ensures easy access to your airway tools

BFlex holder for easy access during cases

Large storage bin organizes your GlideScope video laryngoscopes and airway tools in one place

Disposal bin is designed to support infection control initiatives and house used equipment for easy disposal

GlideScope Core workstation

Protective sleeve to catch drips and keep the scope clean

360° rotating, locking wheels

The Total Airway Solution in One Mobile System

“

You've got what you need right there. In a moment's notice, you can transition from a video laryngoscope to a bronchoscope, or both simultaneously, without a problem. I can very quickly choose the option I need, and see things like I've never been able to see before.

Having an integrated system like this is a huge advantage from both a time and safety standpoint.

Gregory J. Schears, M.D., Anesthesiologist
